# Rain Garden Workshop

## July 22, 2014

8:00 am - 3:00 pm

At: Auburn Research Park  
Hubbard CASIC Building  
559 Devall Drive  
Auburn, AL 36830

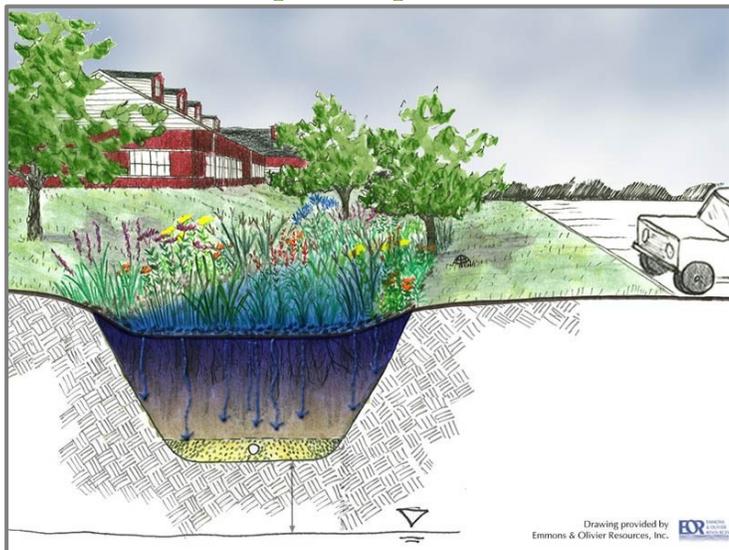

## Why Rain Gardens?

Rain Gardens are planted depressions that use native plants and soil to slow and infiltrate stormwater. Planting one near impervious areas like parking lots, driveways and roofs prevents erosion, water pollution, flooding and recharges groundwater.

### Who Benefits:

- \*Landscapers
- \*City, State and County officials
- \*Turf / Vegetation Mgrs
- \* Homeowners

## Registration:

**\$20** For all patrons

Class limited to first **20** people,  
so register soon!

## What's Included:

- Getting to know your watershed
- Rain Garden Design and Planning
- Vegetation and Maintenance
- Participate in step-by-step installation of a Rain Garden in a residential area.
